Office Action Summary

Art Unit: 2834

The amendment filed 10/22/01 is still non responsive as the claims are not limited to the sigmoidal shape of the piezoelectric actuator. Note that e.g. claim 1 the "wherein --- assumes a non-planar shape --- part of the time following actuation" is merely a statement of desired function and does not define any actual structure. Further, it is not the location which provides the shape, it is the combination of electrode placement and polarization of the piezo material. Further still, a 'non-planar' shape does not define a sigmoidal shape i.e. is not limited to the sigmoidal shape.

The restriction requirement, untraversed in paper no 13 (10-22-01) is hereby repeated and made final.
